

Aeronautical Decision Making and Risk Management

Topic is Aeronautical Decision Making (ADM) and Risk Management (RM). This topic will be spread over two seminars as we first explore terms that are often used to describe ADM but seldom defined and put into context in teaching good ADM and RM practices. We will discuss and analyze some actual decisions made by pilots, their results and how the decision process can be improved upon. This is an interactive seminar so come prepared to engage in an educational dialog. We guarantee you will depart this informative seminar with some new tools for good decision making and managing your flight risks.

Directions: From route 209/199 exit on to Flatbush road. Head north approx 1/2 mile Airport on Right. Aircraft parking available on ramp area.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
